Combat Misinformation with AI

Identify and flag fake news articles using our intelligent detection system. Enhance media literacy and promote access to reliable information.

Reliable Detection, Informed Society

Our model analyzes patterns in text and metadata to classify content accurately. Stay informed and aware in the digital age.

UNSDG GOALS

Goal 4: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels
